SUMMARY

Fullstack engineer with 8+ years in JavaScript and TypeScript and deep frontend roots: a design system adopted by 15+ product teams across a 10M+ MAU ecosystem, LCP cut from 4.1s to 1.3s on a multi-tenant SaaS. On the backend, builds Node.js APIs, Postgres data models, job queues and realtime, including two products built end to end.

SKILLS

Frontend: React 19, Next.js 16, TypeScript, Vite, TanStack Query, Tailwind CSS, shadcn/ui, Storybook, design systems, Module Federation, Core Web Vitals

Backend and data: Node.js, NestJS, Fastify, Hono, REST, GraphQL, OpenAPI, WebSockets, SSE, PostgreSQL, Drizzle, Supabase (Edge Functions, RLS, pgmq), Better Auth, Inngest

Infrastructure and testing: Docker, Vercel, Cloudflare Workers, GitHub Actions, Turborepo, Vitest, Playwright, MSW

AI: Gemini API, Anthropic API, MCP, Claude Code, Cursor

EXPERIENCE

Frontend Engineer — **Fendr (via TIRSoft LLC)** Sep 2026 — Present · Yerevan, Armenia

- Build both web apps, a Partner Portal for body shops and tow companies and an Admin Dashboard, in a Turborepo monorepo set up from scratch: React 19, TypeScript, Vite, TanStack Query, React Router.
- Built the design system (35 components, 24 patterns; shadcn/ui, Storybook) and typed API clients generated from OpenAPI with Orval: TanStack Query hooks, Zod models, MSW mocks. 47 Vitest and Playwright test files.

Founder & Fullstack Engineer — **Proof App** Nov 2025 — Jun 2026 · Remote

- Built an AI-verified fitness product on Telegram end to end as the only engineer (Mini App, bot, backend) and took it to a closed beta: React, TypeScript, Vite, Supabase, Gemini 2.5 Flash, FFmpeg.wasm on the device.
- Designed the Postgres backend: 40+ tables with row-level security, 70+ migrations, 16 Edge Functions and 3 pgmq job queues, including asynchronous video processing and verification.
- One model pass judges reps, form and liveness per video; 20-level XP economy, Telegram Stars payments, TON wallet.

Lead Frontend Engineer (Fullstack Delivery) — **Vizogen** Sep 2025 — Feb 2026 · Contract · Remote

- Owned a multi-tenant AI SaaS module end to end on Next.js and Supabase for 500+ enterprise users: designed schemas, row-level security for tenant isolation and REST contracts alongside the frontend architecture.
- Cut LCP from 4.1s to 1.3s and integration defects by 80% by rebuilding the data layer (TanStack Query, SSG/ISR, SSE).
- Took unit-test coverage from 22% to 78% in three months with AI-augmented workflows (Cursor, custom MCP servers).

Core Frontend Engineer / UI Architect — **MTS Web Services** Feb 2024 — Jun 2025 · Remote

- Cut time-to-market by 25% with a 200+ component React design system used by 15+ teams in a 10M+ MAU ecosystem.
- Removed 3–5 release blockers per sprint by splitting 8 verticals into separate micro-frontends (Module Federation).

Senior Frontend Engineer — **Appfox** Sep 2023 — Jan 2024 · Contract · Remote

- Held a high-load iGaming portal at 50K+ concurrent sessions with zero state-desync incidents: designed WebSocket routing in a Node.js BFF and put 4 payment and KYC providers behind one typed API layer with idempotency keys.
- Cut storefront bundle size by 62% and, with Sentry and PostHog, median time-to-root-cause from 2 hours to 25 minutes.

Frontend Developer, then Lead Frontend Developer — **TIRSoft LLC** Aug 2018 — Sep 2023 · Yerevan, Armenia

- Across 8+ SaaS products, cut API latency by 40% by batching queries with Apollo GraphQL; cut LCP by 68% (3.5s to 1.1s) on 3 flagship products by migrating to Next.js SSR/ISR.
- Cut new-project bootstrap from two weeks to three days with a 40+ component design system and Node.js CLI tooling. Led code review and mentored 5 developers, 2 of them promoted to senior.

SELECTED PROJECTS

- **Nova Prism** (mynovaprism.com): 4-app trading platform in a monorepo: Fastify and Socket.IO API with a trading engine and price feeds, OpenAPI-validated contracts, Drizzle on SQLite, React and Astro front ends, Docker, 58 test files.
- **norav.dev**: portfolio on a custom CMS: Next.js, raw PostgreSQL, 31 migrations, 26 API routes, Zod validation, CI.
- **Nor Events** (in development): event SaaS with AI matching: NestJS, Postgres, pgvector, Drizzle, Better Auth, Inngest, CI.

EDUCATION & LANGUAGES

BSc Computer Science, Armenian State University of Economics · Armenian (native), Russian (fluent), English (professional)
